

TABLA 1

Meses	Desarrollo
2	Marcha automática (reflejo primitivo)
7	Reptación
8	Se mantiene en pie sujeto
10	Gateo con abdomen próximo al suelo
11-21	Gateo cuadrúpedo
13-15	Marcha independiente
18	Realiza la carrera

TABLA 2

Parámetro/movimiento	12 meses	18 meses	24 meses	4 años
Abordaje del suelo con talón	Plantigrado/antepie	Talón	Talón	Talón
Braceo extremidades superiores	No	No	Inicia	Integrado
Flexión de rodilla en el apoyo	No	No	Inicia	Integrado
Separación de los pies durante la marcha	Si	Si	Si	Similar a adulto

Autora: Sara Touceda Rey, podóloga colegiada nº 8383360872. Máster en Podología Podiátrica, Universitat de Barcelona.
